SUBJECT: Three dimensional maps and models

40/5RE

1. This Agency is interested in present and potential availability of three dimensional rubber models and plastic maps of foreign areas that have been or may be constructed by the Naval Photo Interpretation Center.

2. It is requested that a list of the models presently available for loan be transmitted to this office for use in fulfilling possible requests for models of specific areas.

3. On the assumption that the Photo Interpretation Center may be developing a program for the construction of rubber models and plastic relief maps, it is further requested that any available information regarding this program be transmitted to this office. It would be helpful to receive:

- (a) information on planned coverage for areas and scales;
- (b) estimated cost for copies of the rubber models and plastic maps;
- (c) information on the flexibility of the construction schedule in case this office desires to submit its priority needs.
